ACKNOWLEDGMENTS

This book, like all other previous books of mine, is written to challenge conventional wisdom or, more precisely, in the current context, the one on sports—and to replace it with an original way of thinking about its future fate (in relation to training and winning).

Consequently, this book receives no external funding nor help from any formal organization or institution, because of its political incorrectness—as this is something that I often stressed (and repeated) in all my previous books.

My only reward is the discovery of something new in the intellectual history of sports.

In any event, I bear the sole responsibility for the ideas presented in this book.
